## GENERAL NOTES

Note that these are the normal booked diagrams, which can be subject to alteration at any time for operational reasons. In particular, weekend workings are often amended for engineering work. Headcodes beginning with 5 are empty coaching stock (ECS) workings which are generally only shown where they are greater than 6 miles.

If you are interested in HSTs and want to help to preserve the sight and sound of the classic Valenta powered Inter-City 125 in the future then please join us, new members are most welcome, go to [www.125group.org.uk](http://www.125group.org.uk) and subscribe on-line. Members receive our quarterly magazine packed full of background information and current developments on the operational HST fleet and our preservation activities.

**If these diagrams have been useful to you then please consider donating to our exciting 'Project Miller' appeal which aims to bring the National Railway Museum's prototype power car 41001 back to life. Check out [www.projectmiller.org.uk](http://www.projectmiller.org.uk) for details.**
