NOTES ABOUT HSTs USED BY EAST MIDLANDS TRAINS

Diagrams NL081-NL102 Normally worked by EMT core 8 coach HST fleet with VP185 engined power cars, based at Leeds Neville Hill depot.

Diagrams DY021-DY022 Normally worked by former Grand Central 6 coach HSTs with MTU engined power cars, based at Derby Etches Park depot.

GENERAL NOTES

Note that these are the normal booked diagrams, which can be subject to alteration at any time for operational reasons. In particular, weekend workings are also often amended for engineering work. Headcodes beginning with 3 or 5 are empty coaching stock (ECS) workings.

125 GROUP

Formed in 1994 to share news on the fleet, our objective is to preserve a production High Speed Train powered by the original Valenta engine, to this end we have acquired a large number of major components. We have grown to over 600 members and become a registered charity with industrial designer Sir Kenneth Grange our Hon President. 125 Group took the last surviving prototype power car 41001 on long term loan from the National Railway Museum in 2012 and under the 'Project Miller' banner, in honour of the BR Chief Engineer behind the original HST, we have restored it from a static exhibit to full working order for use on Heritage Railways. Thanks to our benefactors, volunteers and the kind help of the railway industry, 41001 is now a regular performer at its home base Great Central Railway (Nottingham), running with our growing fleet of Mk3 coaches.

Interested in HSTs ... then why not join 125 Group? Members receive our quarterly magazine packed full of news, information and informed comment on the mainline HST fleet plus behind the scenes in-depth reports on our preservation activities. Visit our website to join on-line.

If you find these diagrams useful then please help us achieve our aim of building an HST Depot at GCRN Ruddington to house Prototype 41001 and Production HSTs which we plan to acquire in the future. Visit our website for more information and details of how to donate - Thank You!
